### UK CLIENTS

***“The value of effective and intuitive personnel recruitment is core to the growth of any business. Over a number of years we have always returned to 2G and its owner / founder, Gavin Greenhalgh, where a quality over quantity approach is the primary driver. The relationship has grown from client / service provider to one where partnering is the preferred term. They have always excelled in understanding the needs of the business and we only see the relationship growing from strength to strength in the coming years.”***
